

Proctor Cheat Sheet

At-a-glance answer key — expected product and the SE reasoning that earns marks, for all 16 pain points. Score each pain point /25 → 100 per Case Study → **400 total**.

PAIN POINT (CUSTOMER CONCERN)	EXPECTED PRODUCT	KEY SE REASONING
Case Study 1 · AI Security		
Under the EU AI Act, we are classified as a 'Provider' for our internal AI systems. We need to demonstrate robustness and cybersecurity compliance...	AI Defense AI Model and Application Validation	Cisco AI Defense is specifically designed to support Provider obligations under the EU AI Act. We utilize algorithmic red teaming technology for AI...
We are integrating various open-source models and third-party agents into our internal workflows. How can we ensure these assets aren't introducing...	AI Defense Supply Chain Risk Management	Cisco AI Defense addresses this through proactive Supply Chain Risk Management. We scan your model files, repositories, and MCP servers to identify...
We know AI is showing up across our cloud environments faster than security can track it. We're worried we have models, agents, datasets, and...	Cisco AI Defense - AI Cloud Visibility AI Cloud Visibility	With AI Cloud Visibility, Cisco AI Defense continuously discovers AI assets across distributed cloud environments, including models, agents,...
We're running AI workloads in cloud accounts, but we don't have a reliable way to see which models and AI assets are actually in use. We're also...	AI Defense = AI visibility and guardrail integration Multicloud Defense = cloud account connection, traffic visibility, policy attachment, and egress enforcement AI Runtime Protection	Cisco AI Defense uses the integration to discover AI assets in your cloud environments and identify external AI destinations your workloads are...
Case Study 2 · Cloud Edge		
If a breach occurs in one of our public cloud instances, we are terrified that the attacker will move laterally into our core on-premises systems....	Multicloud Defense Multicloud Defense Gateways	Multicloud Defense leverages macro and micro-segmentation capabilities to enforce strict communication boundaries. By integrating with our Hybrid...
Our auditors require proof that our security controls are applied consistently across all our cloud workloads. Gathering this data from different...	Multicloud Defense Multicloud Defense Visibility	Cisco Multicloud Defense provides unified logging and traceability. Because our security framework is integrated across the network fabric, you can...

PAIN POINT (CUSTOMER CONCERN)	EXPECTED PRODUCT	KEY SE REASONING
We have workloads spread across AWS, Azure, and on-premises data centers. Managing security policies individually in each cloud environment is...	Multicloud Defense Unified Security across public clouds	Cisco Multicloud Defense, integrated within our Hybrid Mesh Firewall architecture, provides a unified control plane. You can define security...
We have workloads on-prem, in cloud, and in mixed environments, and policy consistency is becoming difficult. Every environment feels different,...	Cisco Secure Workload Cisco Secure Firewall Cisco Secure Firewall Management Center (FMC) Cisco Security Cloud Control Secure Workload Integration with Secure Firewall Management Center	That's a common hybrid environment challenge. Cisco Secure Workload helps create a more unified segmentation model by using application dependency...
Case Study 3 · DC Edge — Perimeter Firewall		
When our security tools detect a compromised device, our manual response time is too slow. By the time we identify the user and manually isolate...	ISE Security Group Tags (pxGrid integration)	Cisco ISE integrates with your security ecosystem via pxGrid and Adaptive Network Control (ANC). When a threat is detected, ISE can automatically...
Our firewall environment has become too complex to manage manually.	Cisco Security Cloud Control, FMC, FTD Unified Policy Administration	Cisco applies AI-driven analysis to firewall telemetry and policy data to surface optimization opportunities, reduce manual troubleshooting, and...
Most of our traffic is encrypted, so we've lost visibility into a huge part of our environment.	Cisco Secure Firewall (FTD), FMC, Security Cloud Control EVE	Encrypted Visibility Engine (EVE) uses AI/ML-based fingerprinting to analyze encrypted traffic patterns and identify suspicious behavior without...
We're worried traditional signature-based detection won't catch new or unknown attacks quickly enough.	Cisco Secure Firewall (FTD), FMC, Security Cloud Control Snort ML	It adds machine-learning-based detection inside the Snort 3 engine to identify exploit behavior associated with unknown/zero-day threats.
Case Study 4 · Macro & Micro Segmentation		
Network policy helps, but we also need to know what's happening at runtime inside the workload. We need better detection of suspicious behavior and...	Isovalent Tetragon Runtime Security	That's where Tetragon comes in. Tetragon extends the value of Cilium by providing eBPF-based runtime security and threat detection. It monitors...
Our Kubernetes networking feels fragmented across clusters and environments. We're dealing with too many moving parts, inconsistent policies, and...	— Cilium Networking Policies	Cilium provides a modern, eBPF-based Kubernetes networking layer that gives you consistent connectivity, policy enforcement, and visibility across...
Right now we're stitching together separate tools for networking, security, and observability in Kubernetes,	cilium and tetragon	With Cilium for networking and policy, and Tetragon for runtime security, you get a more unified platform for connectivity, segmentation,...

PAIN POINT (CUSTOMER CONCERN)	EXPECTED PRODUCT	KEY SE REASONING
and it's creating too much overhead.		
We know we need microsegmentation, but we don't have enough visibility into east-west flows or application dependencies to create policy safely. We...	Cisco Secure Workload Cisco Secure Firewall Application dependency mapping	That's one of the biggest reasons customers adopt Cisco Secure Workload. It gives you deep visibility into workload communication and application...

Fast scoring: full 25 = right product + Cedarline-specific reasoning + how it helps · ~18 = right product, generic reasoning · ~10 = product OR reasoning, not both · 0 = blank/off-topic.
